

POTNURU SRIDHANALAXMI

Srikakulam | 9381859179 | psrilaxmi06@gmail.com

CAREER OBJECTIVE

Motivated B.Tech student interested in frontend web development, focused on creating clean, responsive and user-friendly websites. Eager to improve development skills through practical projects.

EDUCATION

B.Tech — Dr. B.R. Ambedkar University | Expected Year: 2027 | Percentage: 80%

SKILLS

- **HTML** — Building structured and semantic web pages.
- **CSS** — Creating responsive and attractive website designs.
- **JavaScript** — Adding interactive and dynamic functionality.
- **Responsive Design** — Designing websites for desktop, tablet and mobile.

PROJECTS

Image Gallery — Responsive gallery with category filtering, lightbox viewing and image navigation.

Calculator — Functional calculator supporting arithmetic operations, percentage, decimal calculations and keyboard input.

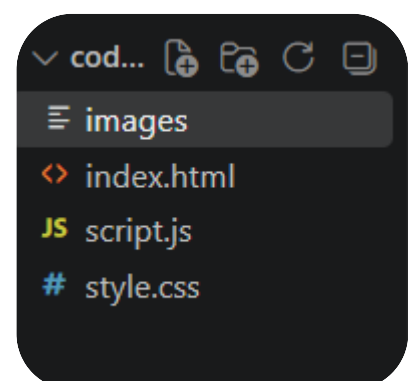

Personal Portfolio — Responsive portfolio website showcasing skills, projects, resume and contact information.

TECHNOLOGIES

HTML • CSS • JavaScript

CONTACT

Edit

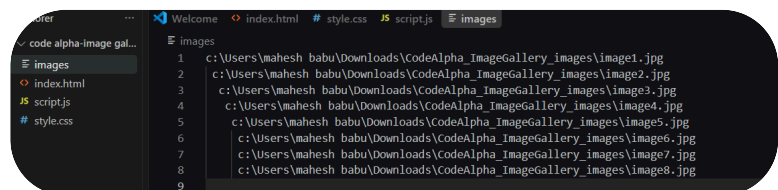

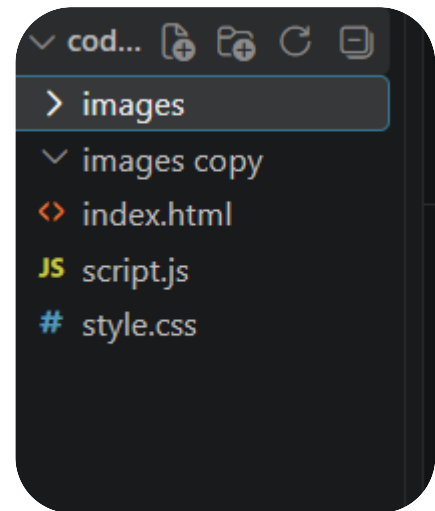

Here are **8 images for your gallery**. The generated sheet shows them labeled `image1.jpg` through `image8.jpg` .

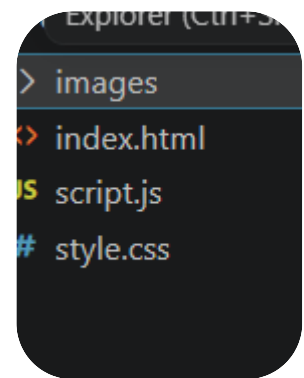

However, they are currently combined into **one image**, not eight separate JPG files. For your project, each picture needs to be a separate file inside your `images` folder.

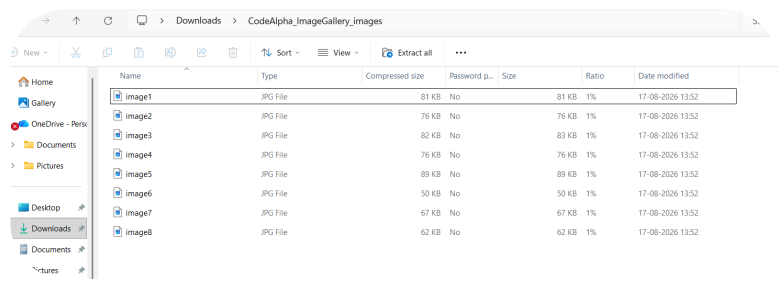

I can ↪ **split these into 8 separate image files and give you the ready-to-use files** for your VS Code project.

its given this answer for the $12+8$ question

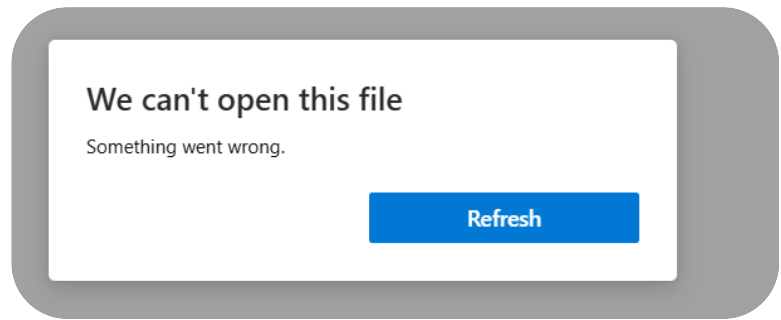

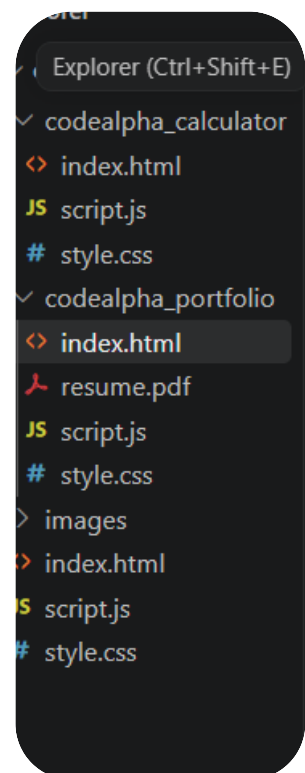

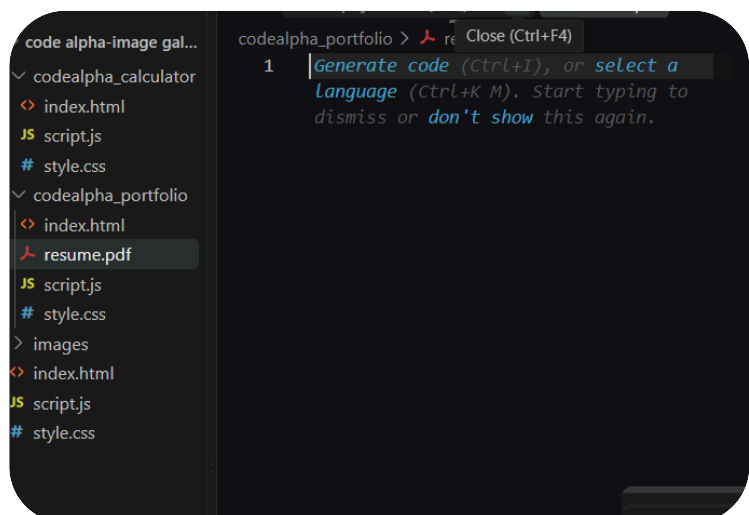

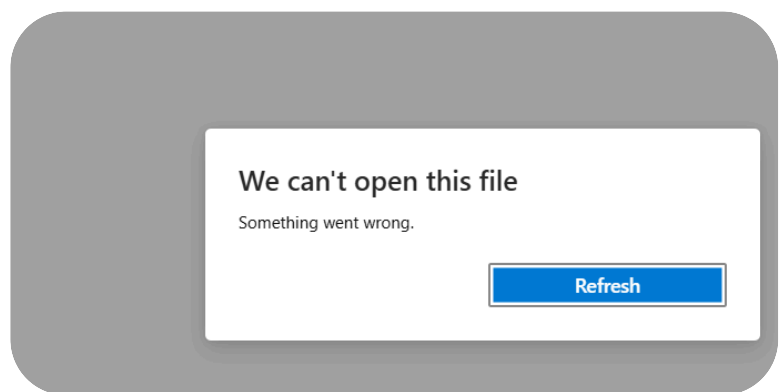

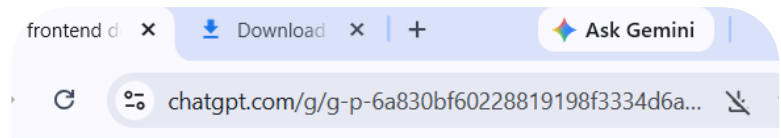

frontend development tasks-codealpha / resume.pdf

EDUCATION

Yesterday		
	CodeAlpha_ImageGallery_images	17-08-2026
	ChatGPT Image Aug 17, 2026, 07_22_33 P...	17-08-2026
	CodeAlpha_ImageGallery_images	17-08-2026

it doesnot show in the downloads

That's okay 👍 **Don't worry about Downloads for now.** We can use the file directly.

The resume file is already available here:

 **Download** resume.pdf

Try this simpler method

1. Click the **Download** resume.pdf link above.
2. If the PDF opens in the browser, press **Ctrl + S**.
3. In the **Save As** window, look at the **left side**.
4. Click **Desktop** instead of Downloads.
5. Set the file name to:

resume.pdf

6. Click **Save**.

Then go to your **Desktop** and check whether resume.pdf is there.

Even easier

You don't actually need to save it to Downloads first.

Once you have resume.pdf saved somewhere, **copy it directly into your VS Code project folder**:

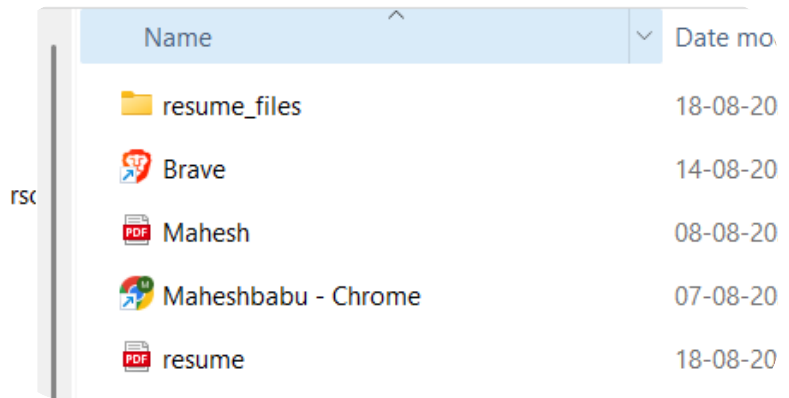

```
codealpha_portfolio
|
├─ index.html
├─ resume.pdf   ← here
├─ script.js
└─ style.css
```

If **Ctrl+S** does not show a **Save As** window, send me a screenshot of what appears after you press **Ctrl+S**, and I'll guide you from there.

 **resume.pdf**
PDF

Ah, I can see it now. 👍

Your screenshot shows a file named `resume` with a PDF icon at the bottom. That is most likely the resume PDF you just saved.

Do this:

1. Right-click the `resume` PDF file.
2. Select **Rename**.
3. Change the name to:

`resume.pdf`

If Windows already hides `.pdf`, just name it `resume`.

4. Press Enter.

Then copy it to your project

Right-click `resume` → **Copy**.

Go to your VS Code project folder:

`codealpha_portfolio`

Paste it there.

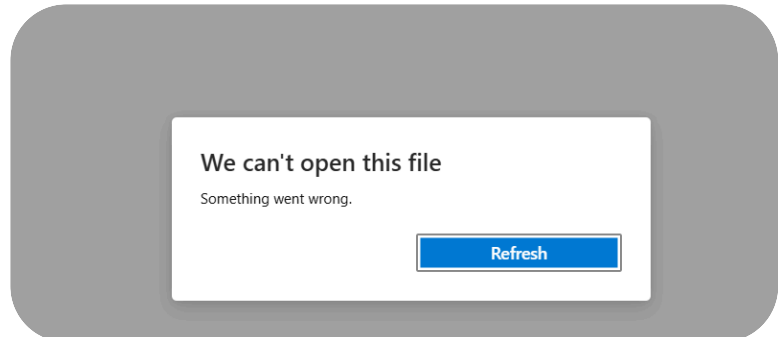

Your VS Code Explorer should finally look like:

```
codealpha_portfolio
├─ index.html
├─ resume.pdf
├─ script.js
└─ style.css
```

Then refresh your portfolio and click **Download Resume**.

Don't use the `resume_files` **folder**. We need the actual PDF file named `resume.pdf`.

I can see the problem. 🙌 The file you saved as `resume` is not opening correctly, so we should **not use that file**.

Let's fix it cleanly.

Step 1 — Delete the broken `resume`

In the folder shown in your previous screenshot:

- Right-click `resume` (the PDF icon)
- Click **Delete**

Don't delete the `resume_files` folder.

Step 2 — Get a fresh copy

Use this file:

 **Open the correct resume PDF**

When it opens and you can see the resume, **do not use Ctrl+S**.

Instead:

1. Press **Ctrl + P**
2. In the print window, find **Destination**
3. Select **Save as PDF**
4. Click **Save**
5. Choose **Desktop**
6. File name:

 resume.pdf

7. Click Save

Step 3 — Put it in your project

Go to the Desktop and find the new resume.pdf .

Right-click → **Copy**.

Then open:

 codealpha_portfolio

Paste it beside index.html :

```
codealpha_portfolio
|
├─ index.html
├─ resume.pdf    ← this one
├─ script.js
└─ style.css
```

Step 4 — Test

Open your portfolio and click **Download Resume**.

Important: Don't rename the old broken resume file. Delete it and create the fresh PDF using **Ctrl + P → Save as PDF**.

If the **Ctrl + P** screen appears, send me a screenshot of it and I'll tell you exactly what to click.
